DETAILED ACTION

1. Figures 15-20 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The abstract of the disclosure is objected to because it is not commensurate with the claimed invention. The abstract should recite a ferroelectric tuning-fork vibration body and a differential amplifier having a capacitor connected between two input terminals, etc. Correction is required. See MPEP § 608.01(b).

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 10-13, 15, 18 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2856

Claim 10 recites that a sensor signal is input between the two input terminals of a differential amplifier. However, it is not clear that a single sensor signal is input between the two input terminals of a differential amplifier. Rather, it would appear that a pair of signals are input between the two input terminals of the differential amplifier. Note page 4, lines 23-25, of the specification. Accordingly, claim 10 should recite a tuning fork vibration body generating sensor signals and a differential amplifier having two input terminals between which said sensor signals are input. Likewise for claims 12, 18 and 19.

5. Claims 10-13, 15, 18 and 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. A complete reply to the final rejection should include cancellation of nonelected claims 16 and 17.

7. Applicant's arguments filed September 28, 2004 have been considered but are moot in view of the new ground(s) of rejection.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2856

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
